

A message from your Board...

Suzanne Weinstein, President

In my opinion, this past month marks a turning point in our association.

The most recent development is the dismissal on 5/16/24 of our case in Manatee County Court of a code violation involving the clickers. This is a huge decision on the part of the judge to agree with our decision to disengage the clickers on all but our emergency access gate. As you may recall, this was done several years ago when it became common knowledge that these clickers and their programming are readily available to one and all on the internet.

On May 8th your Board of Directors met with our County Commissioner Mike Rahn, head of the Public Safety Department Jodie Fiske and several representatives of the code enforcement division. We were joined by several previous board members as well as over 20 households on line. To say that the representatives of the county were impressed by the active participation of our community members is an understatement. They were blown away. Thank you to all who wrote letters, called and generally supported the initiative. As a result we were chosen to participate in an experimental trial of a new emergency access system that integrates first responders' P25 digital voice and data communication (i.e. Click2Enter). This is a system in which a first responder's emergency radio will be designated to open the gates when needed. Unauthorized use of this system would be considered a federal crime. The full implementation of this system will take some time, but our participation in this trial is a big step in securing the safety and well being of our community.

At the recent Board of Directors meeting we approved the contract for the renovation of the bocce courts. Also approved was the contract for the updates in the guard house. So you will see some of our vendors bringing our community these improvements.

In addition, please check out the new vanity light fixtures that have been installed in both the men's and women's bathrooms at the pool. They are lovely. These improvements have been undertaken after hard work on the part of several committees, and of course budgeting. Thank you to all those involved in these updates.

By the time you receive this we will be past Memorial Day. I hope all of you had a very happy and meaningful Memorial Day - I know we have many veterans in our community and they all deserve our thanks for their service. Finally, June also brings Father's Day and to many I wish a very happy day. You too deserve special recognition.

Property Manager Report by Oded Neeman

2023 Financial Audit – We are happy to announce that the 2023 Audit of LakeRidge Falls' financials has been completed and copies are now available on the Association's Engage Portal. As in the last few years, the audit was performed by Braxton & Holway, P.A., a reputable CPA firm located in Bradenton. It is important to note that Braxton & Holway is a member of both the American Institute of Certified Public Accountants and the Florida Institute of Certified Public Accountants. Braxton & Holway indicates in its report that "[i]n our opinion, the financial statements referred to above present fairly, in all materials respects, the financial position of Lakeridge Falls Community Association Inc as of December 31, 2023, and the results of its operations and its cash flows for the year then ended in conformity with the accounting principles generally accepted in the United States of America." Of course, a big thank you is warranted to the 2023 Budget Committee, the Treasurer, and the Board of Directors for an exceptional job.

Burying Downspouts – Lots was said and described about the important Roads & Grounds (R&G) Committee's resourceful research/work. Therefore, let's take another minute and say a couple more things about it. However, and before we do, here is a short recap.

Over a year ago, the R&G Committee was tasked with examining maintenance concerns related to pond erosion, sidewalks, streetlights, mailboxes, and recreation amenities. Because this task encompassed vast areas, the R&G Committee decided, with the Board's blessing, of course, to divide the committee into five crews. In general, each crew was tasked with surveying these areas, writing a report regarding its findings, and thereafter presenting a course of action to address such issues. The R&G Committee would then review the work and recommendations and determine what should be the final recommendations to be brought before the Board of Directors.

Back in November of 2023, we spoke about the Ponds Crew work. In general, the Crew's task was to survey the Association ponds, identify erosions and other issues that may impact the structural integrity of the ponds, and measure the extent of the erosions along the edges of the ponds. Once concluded, the Ponds Crew was to issue a report to the Board of Directors which would share the information and data collected, provide possible explanations for erosion causes, and recommend solutions to address issues discovered.

And indeed, after six months of physically inspecting, measuring, and documenting the ponds, the Crew submitted to the Board of Directors around August of last year an impressive 135-page report of its findings and conclusions. **Please allow us to take a short break and invite all of you to read this very impressive document.** A copy of the report can be found in the Association's Engage Portal. Back to our story, the members of the Ponds Crew didn't lounge around after submitting the report. They worked endlessly on drafting an action plan for the third test site (i.e., the first is the one implemented at Pond #8, and the second one implemented at Pond #15) and other corrective actions they believed could assist greatly with the issue of erosion. Once concluded, a plan for addressing the erosion at the south side of Pond #3 was presented to and approved by the Board of Directors around January of this year.

So why do we present this short, ok not really very short, recap? Well, one of the corrective actions the crew investigated and thereafter recommended adopting was to bury downspouts. In looking at the 135-page report, one would see that the crew believes **"erosion is a natural process that can be exacerbated by the development of the property. We can never eliminate the process**

Continued on page 4

but believe we can slow it down and mitigate the worst effects.” More specifically, the crew stated that it **“appears the runoff eventually gets under the grass and slowly moves the sand into the ponds. The unburied downspouts seem to accelerate that process. Burying the downspouts properly will make the most impact in slowing the backyard erosion we observed.”** Without pointing out one Lot in particular, please see below a picture taken presented by the crew in their report to portray this issue.

Acting on the recommendations presented in the report regarding downspouts, and mainly after further investigation of some of the administrative-related matters, the Board of Directors approved during its April meeting the following motion:

“To require Owners whose Lots were identified in the Pond Survey Summary Report to connect their downspouts to underground drainage piping according to the community-wide standard and Association procedures as appears on the Architectural Guidelines and this without releasing say Owners from any obligation and/or responsibility under LakeRidge Falls’ governing documents, specifically Articles VI and IX, for costs incurred as a consequence of the conduct of the Owner or occupants of the Lot, their agents, contractor, employees, licensees, invitees, or guests, and under the Association responsibility as outlined in Article VIII.”

If you didn't get a headache by now from the complexity of the issue, you are gold. But if you did, please take a short break, drink water, and please come back to read the following attempt to explain the above in a more simple manner.

In short, the crew identified close to 50 downspouts which they believe act as a catalysis to the erosion process. Therefore, the crew suggested, and the Board accepted, to require those who were identified in the report to bury their downspouts. The way it is done is by connecting the downspouts to an underground PVC pipe that discharges the water collected at the gutters directly to the pond located behind those Lots. As promised, it is as simple as that.

How it will work is that in the next couple of weeks the owners of said Lots will receive a notice in the mail and/or email. The notice will direct owners to apply to the Architectural Review Board (ARB) to obtain approval to bury their downspout/s based on the community-wide standard. Once approval is obtained, the owners will be required to complete the work within the timeframe set by the ARB. See, very simple.

Continued on page 5

On a serious note, this matter is of great importance. Erosion creates unsafe conditions, for example for landscapers, endangers the structural integrity of Lots, even for neighboring Lots, leads to unwarranted expenses, for both the Association and the individual owners, and simply draws away from LakeRidge Falls' aesthetic principles.

Therefore, we wish to take a moment and truly thank all impacted owners for their immediate attention and cooperation on this very important matter. Of course, please feel free to contact us with any need or concern on this matter, and will be more than happy to assist. With this in mind, we wish to thank all LakeRidge Falls' members for making LakeRidge Falls a leading community for others to follow in addressing this state-wide issue. Together we can make a difference.

Emergency Access and Gates – Lots were said, discussed, and reported about the issue of the **Emergency Clickers**, clickers that operate a **Remote-Control System**. But before we dive into the fun stuff, here is a short data about the Association's gates.

As all know, the Association has three vehicle entry points:

- Front Residents Only Lane** and **Guests Only Lane** - manned 24-7 – located off Tuttle Ave.
- Back Residents Gate** - designated for approved residents only – located off Lockwood Ridge Rd.
- Emergency Only Gate** - designated for emergency vehicles only - located off Lockwood Ridge Rd.

Manatee County requires, by code, i.e., Section 2-28-2 of the Code of Ordinances, gated communities to have a designated emergency access system. The logic is pretty straightforward. In oversimplified terms, the requirement is to have a system, in addition to any access system used by any given gated community, that would allow first responders immediate access to a gated community in case of an emergency.

While the code requires to have a single designated system, LakeRidge Falls until a few years ago had three systems on each of its vehicle gates: Remote-Control, SOS, and Knox Box. In short, the **Remote-Control System** is a system in which one uses...well... a remote control, similar to a garage door opener, to open the gate. An **SOS system** is a system in which one uses the emergency vehicle's siren to open the gate. A **Knox Box System** is a system in which one uses a special key to open and close the gate.

In 2016, the Association concluded after thorough research that the Remote-Control System was severely compromised. In short, evidence was collected to show parcel trucks, such as UPS and FedEx, small commercial vehicles, such as pool cleaning companies, towing trucks, and unmarked vehicles were gaining access to the community using the Remote-Control System's clickers, aka Emergency Clickers, which are used by first responders. In investigating this matter, the Association discovered that anyone could go on Amazon.com and purchase such a clicker for a cost of about \$10. This notion triggered a major concern with the Board of Directors and the Security Committee at the time as well as the Boards and Committees that followed thereafter.

After all, the Association is spending hundreds of thousands of dollars each year on security measures, some of it for the sole purpose of keeping unwanted individuals from entering the community. Knowing all those measures didn't mean much because they could be bypassed by a wildly available and inexpensive device, compelled the Board of Directors to take action on the matter.

Knowing it holds a fiduciary duty to its members, the various Board of Directors decided to act to ensure the safety and well-being of the Association's residents. As a result, much effort was

invested by the Association to address this matter with Manatee County over the last eight years.

These efforts included in-person meetings with county officials, communication via certified letters and emails, and continuous collection of evidence, mainly video footage, of the misuse of emergency clickers by unauthorized users. In general, the Association pleaded with Manatee County to change the code that operates the Remote-Control System or adopt a new access system. Then came a meeting in early May of this year....

Following an incident that took place in April, LakeRidge Falls' Board of Directors met with the Honorable Mike Rahn, the district County Commissioner, Ms. Jodie Fiske, Director of Manatee County Public Safety, Mr. Tom Wooten, Chief of Code Enforcement, and Ms. Heather Sonntag, Code Enforcement Officer. This meeting was also virtually attended by a couple of dozens of LakeRidge Falls members. While it would be impossible to outline all that was said and discussed during this two-hour-long meeting, it can be reported the Board of Directors felt it was a productive dialog.

And indeed, a few days after the meeting the Board of Directors was informed by the County that LakeRidge Falls was chosen to participate in an experimental test trial of a new emergency access system that integrates first responders' P25 digital voice and data communication (i.e., Click 2 Enter). In simple, a specific frequency on a first responders' emergency radio will be designated to open the gates when used. Because frequencies are allocated by the Federal Communications Commission (FCC), unauthorized usage of them is harder and more importantly considered a federal crime.

While there is still some work to take place before the adoption and thereafter implementation of this new system, the Board of Directors is very hopeful that this is a significant step in addressing what has become a serious security concern. This is a great opportunity to thank all LakeRidge Falls residents who assisted on this matter and of course, the County officials who partake in assisting the community: Commissioner Rahn, Ms. Fiske, Manatee County Sheriff Rick Wells, Mr. Wooten, and Ms. Sonntag for their assistance and cooperation on this matter. Together, we can continue and ensure Manatee County is one of the safest places to live in.

Backflows – By now, all members of the Association should have received a notice from Manatee County reminding them about the requirement to conduct an annual certification test of the backflow prevention device. For those who may not be aware, the backflow prevention device is the standing C-shaped pipe next to the sidewalk in front of the house. The backflow is designed to protect the drinking water from being polluted by contaminated water due to reduced pressure in the county water system. For this reason, Manatee County requires that all homeowners in the county perform a yearly test to ensure the backflow prevention device is operating properly.

As it does every year, the Association contracts with a certified and licensed plumbing company, i.e., The WaterWorks, to perform this task for you. The WaterWorks is scheduled to start the certification work starting the first week of June.

A few things one must consider while The WaterWorks going through this process:

- The WaterWorks will submit the proper forms with Manatee County on behalf of LakeRidge Falls' homeowners ensuring the proper certification process was completed.
- The WaterWorks will install a tag on each backflow when done. The tag indicates the month the certification took place and more importantly that your backflow has passed

the certification test. It also serves as an advertising tool used by most plumbing companies to help residents locate their contact information in case an issue ever arises with the backflow.

- The members who do NOT pass the certification process will receive a notice from The WaterWorks stating the problem with the backflow. Failing to address the issue will result in Manatee County sending a final notice.
- If you receive a notice that your backflow didn't pass, please be advised that you can use any plumbing company recognized by Manatee County to correct the matter. After the matter is fixed, the plumbing company you use should submit the proper certification for you to Manatee County.
- In case your backflow fails the certification process, and you choose to hire The WaterWorks to perform the repair, please note they agreed to a flat fee charge of \$195 for double checks backflows and \$225 for RP backflows.

Please note that failing or passing a backflow may be a subjective matter. Some situations are not clear-cut and are open for interpretation. This usually happens when wear is discovered in one of the backflow's elements. While one company may feel this wear warrants a repair (i.e. fail certification) another may suggest waiting a little bit longer before performing the repair (i.e. pass certification) and vice versa. In these situations, residents might be left uneasy, thinking the vendor might have provided them with a false report. However, please understand that this is not the case. With the above in mind, The WaterWorks' goal is to ensure residents' satisfaction while meeting Manatee County requirements.

Alligator – We received a report last month of a small alligator, i.e. about a foot and a half, roaming around Pond 11. On its [website](#), the Nuisance Alligator Program, a Florida Fish and Wildlife Conservation Commission (FWC) program designed to protect the alligator population while keeping public safety in mind, advises that “[g]enerally, an alligator is deemed a nuisance if it is at least 4 feet in length and the caller believes it poses a threat to people, pets, or property.” While the alligator was said to be smaller than 4 feet and no concerns were expressed regarding safety, we encourage all to please take a moment and read the brochure called [Living with Alligators](#), which is published by the FWC, and which can be found on the Association's website. It provides safety tips and other important information. Remember; please don't attempt to handle the alligator by yourself if you spot it and please make sure your pets are on a leash and directly attended to whenever outside your home. Thank you in advance for your attention and consideration of this matter.

New Annuals – During one of its recent meetings, the Landscape Committee recommended installing 900 annuals, as opposed to 600 as was done during previous transitions, and carrying this change for the next five to six months. The main goal of the committee was to promote fuller and lusher annual beds, which will significantly enhance the overall look of the community. This time around, the committee selected a combination of 600 red and 300 lime green Coleus for all annual beds except for smaller beds which were designed to receive only red.

The University of Florida states that “Coleus is a beautiful landscape plant prized for its colorful foliage... These versatile plants can be used in hanging baskets, containers on patios, or in landscape beds. Coleus is a heat-tolerant, durable annual that has very few disease or insect problems. These plants, which are native to Malaysia and parts of Asia, can really thrive in your

Continued on page 8

Florida landscape during the summer while providing you with interesting foliage.” And why do we share the above with you? As you might guess, this week BrightView Landscape, the Association landscape maintenance company, was on-site to execute the recommendations above.

And why do we share the above with you? As you might guess, BrightView Landscape, the Association landscape maintenance company, was on-site last month to execute the recommendations above. As always, a picture is worth a thousand words...or coleuses...

BOOK CLUBS

History Book Club: Reading List & Discussion Schedule

A history book club is open anyone with an interest in discussing American and global history. Monthly 1-hour meetings are held from 2 to 3pm East Coast Time. Our “Zoom meetings” will normally occur on the third Tuesday of each month. Everyone is encouraged to recommend history books and facilitate our discussions. Members are encouraged to pursue their interests and curiosity, while selecting books that are both well written and not overly lengthy. Participants will receive a Zoom link about two days prior to the meeting. Anyone interested in joining should contact Stu Sutin at: sutindoc@gmail.com.

Scheduled discussions for 2024 include:

June-August no meetings

September 19. J. Furman Daniel III. **Patton Battling with History**, Lee Kitchen, facilitator
October 22. Jamin Ansery. **Destiny Disrupted**. Paul Urbanick, facilitator
November 19. Andrew Roberts. **Churchill**. Peter Smerd, facilitator
December 17. Jonathan Philips. **The Fourth Crusade & the Sacking of Constantinople**, Orlando Rodriguez, facilitator

Wine and Fiction Book Club

LakeRidge Falls Wine and Fiction Book Club June Selection:

Go as A River

by Shelly Read

In October 1948, young Victoria Nash delivers late-season peaches from her family's farm set amid the wild beauty of Colorado. As she heads into her village, a disheveled stranger stops to ask her the way. How she chooses to answer will unknowingly alter the course of both of their young lives. This mesmerizing story of split-second choices and courageous acts propel Victoria away from the only home she has ever known and towards a reckoning with loss, hope and her own untapped strength.

Please join us as Marion Ferry, our discussion leader, helps us explore this coming-of-age story:

When: Tuesday, June 25th

Where: Grand Salon

Time: 7:00 PM

LRF Book Club

See you back in September

The Tuesday LRF book club is on hiatus for the summer. We will resume in September with *The Reluctant Fundamentalist* by Moshin Hamud. The October book will be *The Heaven and Earth Grocery Store* by James McBride. Hope to see you in September.

Four Florida **FOODIES** Restaurant Ratings

Ratings by Fern & Bob Rouleau and Linda & Gunner Lorenz. These are our opinions for the particular day and time we went, which may change with different chefs and/or servers on a different day. In fact we HAVE found that the food has varied and would get different grades on different days, even ones we loved.

Sunday Brunch - University Park Country Club - A

- Never ending choice of food
- Pricey but worth it
- Great for special occasions
- Service good

Dim Sum King - C+ - 8194 Tourist Center Dr, Bradenton

- Service good
- Has regular Chinese menu as well as dim sum dishes
- Food could be better

Tamiami Tap - B - 711 South Osprey Ave, Sarasota

- Service excellent
- Food average
- Don't go on Wed - trivia night
- Tater tots good

Glory Days Grill - C+ - 8253 Cooper Creek Blvd

- Good service
- Average food
- Daily specials
- Salsa and chips were plain
- Soft pretzels and salad was good

Chianti - A - 3900 Clark Rd, Sarasota

- Very pretty place
- Nice ambiance
- Service good
- Food excellent
- Fresh oven baked bread served warm w oil, butter and olives.
